EVN at a brief glance

EVN

Corporate profile

EVN is a leading, international and publicly listed energy and environmental services company, with headquarters in Lower Austria, the country's largest federal province. On the basis of a state-of-the-art infrastructure, EVN offers electricity, gas, heat, water, waste incineration and related services from a single supplier and supplies these services to more than one million customers here. Starting from its domestic market in Lower Austria, EVN has been pursuing a dynamic and continually well conceived expansion strategy. At the beginning of 2005 EVN already entered the Bulgarian market, where it now supplies electricity to 1.7 million customers and heat to 33,600 customers. In April 2006 EVN succeeded in entering the Macedonian market, where 0.8 million customers are provided with electricity. EVN has also been able to successfully position itself in the energy industry in Albania, Germany and Croatia. Thus EVN safeguards and improves the quality of life of more than 3.7 million energy customers.

Based on the acquisition of a German environmental services group in 2003, EVN significantly expanded its product portfolio and geographical outreach. It managed to build up a second strategic pillar of its business operations, the Environmental Services segment. EVN boasts extensive expertise in the planning and construction of water supply, wastewater treatment, desalination and thermal waste incineration plants thanks to more than 90 environmental projects carried out in its markets. EVN supplies some 14 million customers on the basis of the successful projects implemented in Central, Eastern and South Eastern Europe in the past 20 years.

On balance, EVN operates in 20 countries in the energy and environmental services businesses.

Changes in the Executive Board and Supervisory Board of EVN AG

On January 20th, 2011 the Supervisory Board appointed Peter Layr to serve as the new Spokesman of the Executive Board of EVN AG. In this capacity he succeeded Burkhard Hofer, who resigned from the Executive Board of EVN AG by mutual agreement effective on this date. Stefan Szyszkowitz was also named to serve on the Executive Board of EVN AG for a period of five years as of January 20th, 2011.

The 82nd Annual General Meeting of EVN held on January 20th, 2011 resolved to reduce the number of shareholder representatives on the Supervisory Board from thirteen to ten members. Including the corresponding reduction of employee representatives in the Supervisory Board from seven to five, the total number of people serving on the EVN Supervisory Board fell from 20 to 15 members. At its meeting held on January 20th, 2011, Burkhard Hofer was elected to the position of Chairman of the Supervisory Board.

Introduction by the Executive Board

The sustainable changes taking place in Europe's energy policy in 2011 confirms EVN's strategic orientation which the company has been pursuing for years. In its electricity production EVN relies on a flexible generation mix of hydropower and thermal power, as well as other renewable energies, and places sustainability aspects and a secure energy supply at the centre of its strategic decisions.

In the 2010/11 financial year important steps were taken to achieve EVN's medium- and long-term target of increasing the share of renewable energies in its power generation mix to 50%. We expanded the share of hydropower by acquiring a 13.0% stake in VERBUND-Innkraftwerke GmbH and opening the revitalised Schütt small-scale hydropower plant. Since July 2011 the new Markgrafneusiedl wind park has been feeding electricity into the power grid. A wind park will also be opened in Tattendorf in November 2011. EVN now operates nine wind parks with a total capacity of 138 MW which delivers electricity for up to 80,000 households in Lower Austria.

In the light of the challenging business environment, we favourably look upon the business results in the 2010/11 financial year. We see them as confirmation of our strategy to increasingly focus on the consolidation of our existing core markets and the domestic market as well as the realisation of investment projects which have already been initiated. Despite a decline in revenue of 0.8%, the operating result rose by 16.8%, to EUR 218.7m, and the financial results fell by 50.0% to EUR 41.8m. The Group net profit was EUR 189.7m, or 8.4% below the prior-year. As an expression of our sustainable business model we will propose a slightly higher dividend of EUR 0.41 per share and thus an increase in the dividend payout ratio to 38.5%.

Three handwritten signatures in black ink, corresponding to the three men in the photograph above. The signatures are stylized and cursive.

The EVN Group strategy

The cornerstone of the EVN business strategy until the year 2020 will be to **consolidate its operations** in existing core markets and its domestic market and to implement already initiated investment projects on schedule.

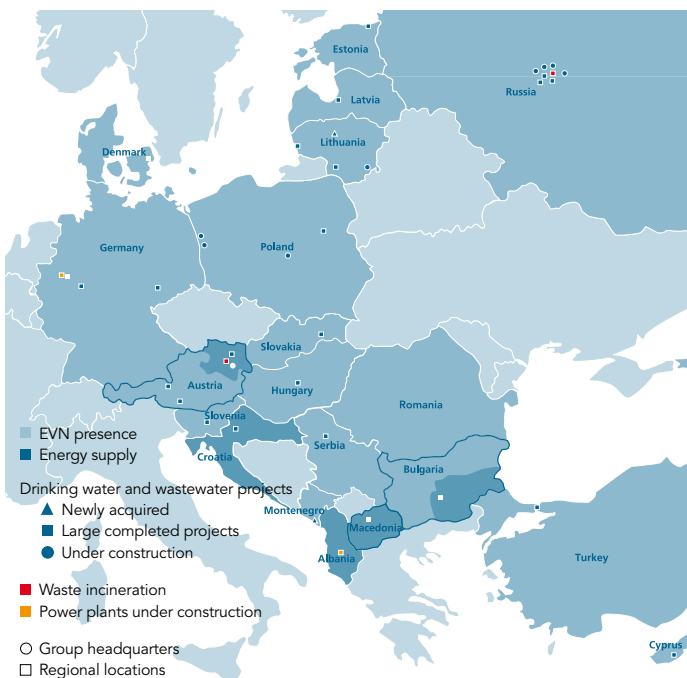

In the **Generation segment** the focus is on expanding power generation from renewable energy sources, with the goal that renewable energies should comprise 50% of the future power generation mix, up from 30%. The coverage ratio from EVN's own power generating capacities should rise from 20% to between 40% and 60%.

Investments in the **Network Infrastructure segment** will continue to focus on ensuring the reliability and security of the energy supply.

The **Energy Trade and Supply segment** will particularly concentrate on products designed to enhance the energy efficiency of our customers and the realisation of projects in the heating business.

The **Energy Supply South East Europe** segment is pursuing the expansion of gas pipelines along the Adriatic seacoast in Croatia.

The international project business offers growth opportunities in the **Environmental Services segment**. Its share of total Group revenue and earnings is expected to increase significantly on a medium-term basis.

Sustainable corporate management

As a responsible energy and environmental services provider, EVN rises to the challenge of treating economic, ecological and social aspects as a unified whole in order to create a balance among the demands of different stakeholder groups. In pursuing its corporate strategy, EVN is clearly committed to sustainability. As a consequence of this orientation, EVN joined the UN Global Compact in September 2005.

From an **economic** point of view, the primary target is to achieve a sustainable increase in shareholder value by ensuring the profitability of the operational units as well as continuing the integration of the subsidiaries in Bulgaria and Macedonia. In **ecological** terms, EVN is focusing on actively contributing to environmental and climate protection by promoting the expansion of renewable energy sources as well as enhancing its own energy efficiency and that of its customers. EVN's top priority is to safeguard the reliability and security of the energy supply in all the areas it covers and at all times. In assuming its **corporate social responsibility**, EVN also participates in numerous initiatives beyond its operating business to promote the welfare of children and young people. EVN is a fair and attractive employer for its employees, giving high priority to a comprehensive training and further education offering, operational and occupational safety and the promotion of employee health.
